Calicut
Palmer, Boy
Love

Dear Dr. Palau:

I don't have to write it, but I hope everything is well at Poly and at the Spi.

I have been postponing this letter for months now, since I'm having so much work to do that I couldn't even go to Mayaguez for my mother's death anniversary. By asking as many questions as they will permit of the Poly students I see; and reading the Polygraph; I am, not up to date, but well informed of Poly life -

All Poly students here at the school are doing well. I think you know already about Orlando Torres' nervous breakdown. He had to leave school and is not coming back any more -

In 10 days I'll have my finals (we are in 3 trimester a year schedule) and then I'll begin my Clinical studies. I mean my Physical Diagnosis, Chemical Pathology, Surgery, Pediatrics, etc. I will have my bag with all the things that go there in -
Oh, and they will call us DOCTORS - ejam!!
"

I'm doing well enough and planning
for this coming summer. May I know
your plans? I hope the Department
of Biology is counting me in for this
summer, since you know how well
I enjoy those days at Poly and how
badly I need the work.

I hope ~~to~~ be able to visit
you all this coming Feb. 22 -

Edison Rivier says that Dr. Brown
interviewed him at Columbia U. &
he thinks he can get in. I hope so too!

Give my regards to Dr. Velez &
Hilda - and I hope to see you soon!!

Sincerely,

Hanley
