A HOSPITAL IS: “An institution for the reception, care, and medical treatment of the sick or wounded.” If you feel sick, the doors are always open to the sick. No one ever goes there. An increasing number of sick people in a community deepens the conviction of others that sickness is incurable. There is no end to the increasing number and need of larger hospitals; so long as hospitals try to cure sick people only. Hospitalization of the sick is like pruning the blossoms of a fruit tree and neglecting the soil from which the roots of the tree derive its strength.

THE PAN AMERICAN CLINIC, INC.: An institution organized and definitely planned for the WELTED and the WOUNDED. Of course there will have to be provision made for the sick. We hope to see a good hospital for the sick, in every county in the State. To those we can send the sick of every county back to their family doctor, and wish to have these hospitals send us their patients who especially need Pan American Clinic’s attention.

A PREVENTIVE SERVICE: Our purpose is to prevent sickness by catering properly for the human race from entry stage on through maturity and to a rich old age. The longevity of active life of usefulness can be extended; the growing efficiency of service and power of man can and should increase steadily with the years. Our primary purpose is to preserve health in the body, soul and mind of man, and thus to introduce the necessity of the care of the family, the home as health center. The Texas new school law establishes counselors for the orientation of the children in the Public Schools, a step in the right direction. The second step proposed by the Pan American Clinic is in the case and nourishment of the whole man and of every man in his physical and social welfare. This is an experiment to find out, to try out and to uncover a very much overlooked Truth, Principle and Effect of man’s composite nature in relation to Health and Sickness.

THE TRUTH IS: Man’s greatest asset in this world is the Health of his physical body and of his spiritual soul. We are souls with bodies.

THE PRINCIPLE IS: The Natural Laws governing man’s body and all creation are essentially the same as the Spiritual Laws governing man’s soul. Scientist J. Robert Oppenheimer (Life October 10, 1949, page 136) puts it this way: “Neither the human soul as something to be saved nor man as a part of society can be ignored; it is not easy to consider these two concepts without some sense that each complements the other.” The body and the soul is like husband and wife, each useless without the other. Man is like a car and a chauffeur; the connection between the two are the gadgets that go with the car. The chauffeur connects the body and soul of man.

THE EFFECT: This applied principle leads to a logical and fundamental cause. The cause necessarily or necessarily produces health or sickness, strength or weakness in man as a composite being according to man’s willingness to follow or to learn and to apply this heavenly principle to his personal every day living.

November, 1949.

THE DEMONSTRATION: Of the above will take the combined services and energies of God-fearing Specialists who renewing serve, not for the same or for the money they get from such labor but for the joy, the privilege and the opportunity they have of putting their best thought, their understanding skill and their physical strength into the victory of humanity’s battle for health. Our Shoppers will ever be: Health, Vigor and Longevity for Man.

This Clinic IS Different: In kind, in character and in emphasis from hospitals and clinics of Texas. It is to go to the very roots of man’s greatest need—the preservation of his health, of his capacity and of his abundant living in the physical, the intellectual and the moral realm so as to meet the demands of this new civilization into which we are definitely headed.

The Clinic IS: 1. To take the family as a unit and the home as a basis of its health program and to bring the family out where it is very worth while doing. 2. To provide accommodations for those bringing patients. In addition to the usual cabins and hotel rooms there are planned apartments in which the family may remain, with the patient in an adjoining room. These apartments will be for those who desire such and are willing to pay the added cost. These apartments will be for those who desire such and are willing to pay the added cost. These apartments will be for those who desire such and are willing to pay the added cost. These apartments will be for those who desire such and are willing to pay the added cost. These apartments will be for those who desire such and are willing to pay the added cost.

In the realization of these plans for this and future generations I covet the devout consideration, the careful study of what such a Clinic will mean for all Pan American, and especially do I hope for the energetic cooperation of every one who reads this or hears of the Pan American Clinic.

In due time a brochure will be printed and distributed.

TEXT: I will bring health and cure; I will roll away their pain and truth. Jeremiah 33:8.
What Is The
Pan American Clinic, Inc?

The objective is to develop in mankind
healthy physical bodies, well-rounded charac-
ters, resourceful, independent, economical
and a sturdy faith through technical
training in three closely related but separately operated
DEPARTMENTs based on three historical facts,

Man is GOD'S greatest work in creation,
Men is this world's greatest asset and
Men's HOME is this world's greatest in-
situation.

DEPARTMENT ONE — Men's Physical Health

This is a medical and surgical depart-
ment — within reach of all — for diagnosis,
treatment and preservation of family health
by prevention of disease and care of the
individual from birth to maturity, in order to
keep people well. Southwestern, Texas, including
Dilley, is well supplied with hospitals for this
area. FAC's main work will be to keep people
well.

DEPARTMENT TWO — Men's Economic Health

This gives a course of two years in applied
agriculture to be learned by doing, similar to
Tread Schools. Instruction of the family will
be in Methods, Means and Management
of a stock-farm as a private enterprise for
the establishment of the home as the world's
greatest institution. To this end provision
will be made for graduates to purchase their
homes on an installment plan, with inspection
and control by this department till the farm is
stabilized.

DEPARTMENT THREE — Men's Theological Health

This offers a training of the individual
and family in abundant living. Familiar back
instruction, counsel and orientation in a
philosophy of life leading to right attitudes
in relation to man to himself, of man to
humanity and of man to God, based on the
teachings and principles of the MASTER
of Galilee. This personal thorough adjustment
of man is essential if leadership is to be
achieved and maintained in the civilization
of the kinship of man and the parliament
of nations —

"One God, one law, one element
And one far-off divine goal
To which all creation strains."

General Douglas MacArthur put it this
way: "The problem is basically theological
and involves a spiritual renaissance and
improvement of human character that will
synergize with our almost innumerable
advances in science, art, literature and all
material and cultural development of the past
two-thousand years. It must be of the spirit
if we are to save the flesh."

The Pan American Clinic proposes, for
young married couples, a WAY OF LIFE
challenging and practical, leading to the
development of our now limited acreage
of unimproved land and the settlement of same
by families spiritually, economically and
physically developed to manage a family and
farm as a home. This is the best guarantee
for the preservation of freedom and liberty,
peace and prosperity in this generation. We
are trying to get down to the very roots in
the solution of our present day problems of
human needs. This is therefore what the
PAN-AMERICAN CLINIC IS — an insti-
tution for the orientation of young parents in
the establishment of their home as the great-
est institution on earth.

"The bottom four-fifths of the world is
going Communist because they are hungry,
terribly unhappy and grimly determined
to rise out of their destitution," says F. E.
Landis in his book WAKE UP OR BLOW
UP, Beul. These do not give a whip for
freedom and liberty. There want food, shelter
dressing, clothing. We ought to show them a better
way by providing land and teaching young
parents in the way to build their homes on the
farm and how to pay for it.

Signed,

JOHN WILLIAM HARRIS,
President
September, 1951

Pan American Clinic, Dilley, Texas

faces the Pan American Highway, U.S. 81, a tarmacked
traffic artery 5,000 miles long
for all nations from Alaska to
Chile and Argentina. Along this
life giving artery are:
millions of cultivated acres
waiting for the plow... and
millions of people eager to
own a farm but cannot.

Half a million potential parents are
graduating from College yearly
and millions more from high
schools in U.S.A. These are
asking not for land grants but
for training. FAC outlines a WAY OF
LIFE by which they can acquire
as an independent entrepreneur, a
HOME on the farm.

The Western Hemisphere, handed
down with worn mountains and
fertile plains, grass for livestock... a
human form... offering struggling
humanity wealth and beauty
plus Heaven's love and power in
the creation of man's home as the
world's greatest institution.
